

Assignment –2

Introducing Relational Databases.

1) Which field of the Customers table is the primary key?

Answer:- Snum

2) What is the 4th column of the Customers table?

Answer:- Rating

3) What is another word for row? For column?

Answer:- row- Entity ,Tuple, Opportunity

Column- Attribute, Method, key

4) Why isn't it possible to see the first five rows of a table?

Answer:- Because we insert the value in the table and it will insert according to the its address here insertion order is not fixed.

hence we can arrange the table asc and desc order so we can't get the exactly first and last record from the table.
