

Assignment –3

Overview of SQL.

1) Does ANSI recognize the data type DATE?

Answer:- Yes, the ANSI SQL standard recognizes the DATE data type.

The standard defines DATE to store calendar dates, specifically in the YYYY-MM-DD format, without a time component.

2) Which subdivision of SQL is used to insert values in tables?

Answer:- Data Manipulation Language(DML)

*Syntax-

```
Insert into table_name (col1, col2, col2) values(10,'Abc',10.3);
```
